## Tuberculosis Case Management

A workshop for  
Public Health  
Workers

## Workshop Description

This workshop is recommended for public health personnel to strengthen their skills in case management of tuberculosis (TB). Participants should be actively involved in a local TB control program.

There is no cost for this training. It is provided by the Michigan Department of Community Health, American Lung Association of Michigan, and the Office of Public Health Practice at the University of Michigan School of Public Health.

### Contact Hours for Nurses

This educational activity has been approved for 3.4 contact hours.

Contact hours are provided by the Office of Public Health Practice at the University of Michigan School of Public Health. The Office of Public Health Practice at the University of Michigan School of Public Health is an approved provider of continuing nursing education by the Michigan Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

## Objectives

Upon completion of this course, the participant will be able to:

Describe the fundamentals of tuberculosis as they relate to case management

Define case management

Describe the role of the TB nurse case manager

List elements of the case management process

Describe the importance of directly observed therapy

Identify activities for implementing TB case management

Identify legal and ethical issues associated with case management

No commercial support is being received for this event. The planners and presenters have no potential conflict of interest.
